

NWCCA League Membership and Timing System Information 2021

Registered league riders are loaned the league's **RETURNABLE** race number, to keep these between events and use at every league round. **At the end of the season please promptly return CLEANED race numbers.**

You can either BUY a transponder which you keep from year to year which has a yellow label, OR borrow a transponder at each race and return it after the race which has a white label.

Volunteers spend a lot of time chasing riders up to return items not returned, and clean dirty items.

Volunteers are not paid for their time.

If you forget your race numbers or your own transponder, the sign on team will issue you with a non-league race number and transponder **for that race only**. You **MUST** return the temporary number and transponder after that race.

Transponders and race numbers cost money, please look after them.

DO	DON'T
Bring your numbers to every race, and your transponder if you have bought one.	Swap transponders with other riders – this causes chaos for judges!
Attach the strap to the transponder as: 	Go near the finish area with your transponder whilst other races are on, this applies to your children as well
Check you are wearing YOUR transponder, not someone else's	Put your transponder on your wrist or in your back pocket for the race
Wear your transponder on the outside of your ankle, and inside clothing	Fasten your transponder to your bike
Inform the commissaire at the start if you are not wearing your transponder	Put your transponder in the washing machine
Keep your numbers, transponder and ankle strap clean	Stop on or close to the finish line at the end of the race, move well clear
Ride smoothly over the transponder mat, it will pick up your signal better.	Land your bike hard on the transponder mat, it can break the cable.

Please read the NWCCA league rules at <http://nwcca.org.uk/league-rules/>
